

## RoHS/REACH Compliance Policy

The company is committed to controlling the use of chemicals, raw materials, and products in order to prevent and control hazardous substance contamination, and to ensure compliance with customer-specified standards, as follows.

Banned substances	CAS No.	Scope	Standard
(Cadmium; Cd)	7740-43-9	Used in plastics, paints, coatings, and metallic materials in electrical and electronic equipment (EEE) at the homogeneous material level.	<100 ppm (0.01%)
(Lead; Pb)	7439-92-1	Used in solder, glass, ceramics, and components of electrical and electronic equipment (EEE) at the homogeneous material level.	<1000 ppm (0.1%)
(Mercury; Hg)	7439-97-6	Used in lamps, switches, relays, and measuring devices in electrical and electronic equipment (EEE) at the homogeneous material level.	<1000 ppm (0.1%)
Hexavalent chromium compounds (Cr <sup>+6</sup> )	18540-29-9	Used in surface treatment and anti-corrosion coatings of metals in electrical and electronic equipment (EEE) at the homogeneous material level.	<1000 ppm (0.1%)
(Polybrominated Biphenyls; PBB)		Used as flame retardants in plastic materials of electrical and electronic equipment (EEE) at the homogeneous material level	<1000 ppm (0.1%)
(Polybrominated Diphenyl Ethers; PBDE)		Used as flame retardants in plastic materials of electrical and electronic equipment (EEE) at the homogeneous material level.	<1000 ppm (0.1%)
(Bis(2-Ethylhexyl) phthalate; DEHP)		Used as a plasticizer in PVC for cables, insulation, and components of electrical and electronic equipment (EEE) at the homogeneous material level.	<1000 ppm (0.1%)
(Benzyl butyl phthalate; BBP)		Used as a plasticizer in plastics, particularly PVC, in electrical and electronic equipment (EEE) at the homogeneous material level.	<1000 ppm (0.1%)
(Dibutyl phthalate; DBP)		Used as a plasticizer in plastics, adhesives, and coatings in electrical and electronic equipment (EEE) at the homogeneous material level.	<1000 ppm (0.1%)
(Diisobutyl phthalate; DIBP)		Used as a plasticizer in plastics and polymeric materials in electrical and electronic equipment (EEE) at the homogeneous material level.	<1000 ppm (0.1%)

Effective January 8 , 2024

( Mr. Vincent Lu )

Vice Managing Director
